

EDUCATION

BTech , Computer Science and Artificial Intelligence	Plaksha University, Mohali	CGPA - 8.91	2028
12th - A-Levels	Rahul International School, Mumbai	90.75%	2024
10th - ICSE	Chatrabhuj Narsee Memorial School, Mumbai	97.6%	2022

EXPERIENCE

Analyst Intern WYSER- VC	May 2025 - July 2025
• Built and deployed 2 agentic AI tools for startup due diligence and founder screening. • Tools orchestrated to analyze founder, product, and market data to support early-stage investment decisions.	
Co-founder The Banana	May 2023 - September 2024
• Founded a science communication initiative simplifying 15+ research papers in physics and artificial intelligence. • Led a 5-member team to make academic research accessible to a broad audience.	

POSITIONS OF RESPONSIBILITY

President Plaksha Finance Cell	September 2025 - Present
• Led a 25-member core team managing strategy, operations, and execution of initiatives. • Organized a national finance competition with 100+ participants and a 35,000 prize pool. • Delivered a personal finance workshop for 120+ students.	
Financial Analyst Plaksha Finance Cell	September 2024 - September 2025
• Hosted two finance competitions with 100+ participants. • Published articles in the club's finance newsletter.	
Chief Green Officer Ayika Foundation	October 2022 - September 2024
• Led environmental initiatives including beach cleanups(350+ kgs of waste), recycling (50kgs of electronic waste), and awareness drives. • Created a climate change curriculum taught to 400+ students from 3rd to 7th grade across 4 schools in Mumbai.	

SKILLS

- **Programming:** Python, C, C++, SQL, Tensor Flow, PyTorch, Keras
- **AI:** LLM APIs, AI Agent Orchestration

PROJECTS

Authorship Attribution in Rap Lyrics A Stylometric and Machine Learning Analysis Github Repo Link
• Built a Kendrick vs J. Cole authorship classifier on a self-scraped 134-song corpus, comparing classical stylometry (Burrows' Delta), TF-IDF linear models, and a character-level CNN under unified 5x5 cross-validation with BCa bootstrap CIs and BH-FDR multiplicity control; best model reached 93.6 percent accuracy. • Engineered 18 stylometric features (lexical diversity, function-word rate, CMU-dictionary rhyme density) and delivered TreeSHAP-based interpretability analysis while comparing more than 7 different ML and Statistical Models.
Urban Heat Island Severity Prediction Indian Context (Bengaluru) Github Repo Link
• Built an end-to-end geospatial ML pipeline predicting Urban Heat Island intensity by pulling multispectral indices (NDVI, NDBI, EVI, Albedo) via Google Earth Engine, urban morphology features (building density, street network, SVF) via OSMnx/GeoPandas, and merging them with socioeconomic data. • Trained and benchmarked Random Forest, XGBoost, KNN, and SVM models for both regression and 4-class classification using Stratified 5-Fold and Spatial Block Cross-Validation, with Optuna hyperparameter tuning — achieving R² = 0.79 for LST regression and 86.7% ROC-AUC for UHI severity classification using scikit-learn and XGBoost.

ACHIEVEMENTS

- **Placed 3rd out of 100+ participants** nationwide in a Portfolio Management Competition at Ashoka University's Shatranj Fest.
- **Placed 3rd out of 100+ participants** nationwide in a business quiz as part of Aeternum, Plaksha University's E-Summit.
- **Placed 1st out of 170+ Participants** nationwide in Startup Showdown at Ashokha University's Economic Fest
